Personalized Attention

Your child gets one-on-one attention. Students learn at their own pace, with teachers offering a combination of challenge and support.

Movement and Play

Children need to move! Every day starts with movement exercises and every hour ends with recess.

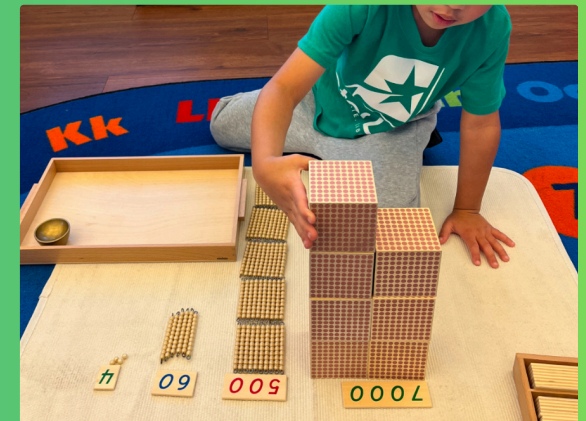

THE STAR LAB GUARANTEE

We provide as much support as is needed for all students to achieve on- or above-grade level.

We offer a fusion of research-based methods that have been proven to be successful such as:

- Montessori materials for hands-on engagement
- UFLI for phonics
- Motor Lab for movement

HANDS-ON LEARNING
IS FUN!

Star Lab believes that children learn with their whole bodies. We use puzzles and colorful real-world objects - not electronics - to teach reading, writing, math, science, and social studies.
